

NATURA MASTER

Biological gel for removal of scale from hygienic facilities

- **Natura Master is a cleaner for sanitary facilities on a natural lactic acid base for removal of unpleasant odours from limestone, fats, bacteria and urinary sediment.**
- **More than 99% of the surfactants are biodegradable.**
- **Prevents corrosion of chrome-plated parts of sanitary facilities and protects them from scratches and stains.**
- **Non-corrosive, does not contain aggressive acids and the metallic parts may be cleaned without harm.**
- **Pleasant fresh fragrance of mint.**
- **Thanks to its viscosity, the agent also adheres to vertical surfaces and thus has a longer acting time**

USAGE

Natura Master is used in toilets, bathrooms, slop sinks/sings, taps, water fountains, tiles, etc.

INSTRUCTIONS FOR USE

Used in a concentrated form. Apply Natura Master to the surface you want to treat. Leave to act for 2 to 4 minutes and properly rinse with clean water.

CONDITIONS FOR USE

Prevent contact with magnesium, aluminium, zinc, nylon, polished marble and zinc-plated surfaces. Prevent contact with the eyes. Keep out of the reach of children.

CHARACTERISTICS

Type: Heavy cleaning agent, which removes odours from all sanitary facilities.

Colour: light blue

Fragrance: mint

pH: ± 2

Density: ± 1.06 g/cm³

All information in this document is based on our practical experience and/or laboratory tests.

Due to the large spectrum of circumstances for usage and unpredictable human factors, we recommend that you always test our products before final usage. This technical data sheet has perhaps already been revised based on legislation, availability of the individual ingredients or newly acquired information. We can send you upon request the latest valid version, which is at the same time the sole valid version.
